

FROM THE DESK

SUMEET WALIA

Chairman,
CII-Tata
Communications
Centre of Digital
Transformation

Dear Reader,

In this edition of our newsletter, we want to draw your attention to cyber threats that continue to take place across industries and reiterate the importance of cyber security. The International Data Corporation (IDC) estimates that 93 per cent of Indian organisations have just basic cybersecurity protection in place, which is truly shocking and hence the security conversation within organisations clearly needs to change

This Dx Dialogue newsletter takes a close look at the evolving Cyber Security trends in India. From emerging cyber-threats to the Indian cyber-law for blockchain regulation to learning about its various aspects and how we at the CDT centre are helping organisations strategize on their next move towards Cyber Security.

I would be glad to hear your thoughts on this topic and understand the steps your organisation is taking to be resilient to cyber threats.
